Lip or chin wax

Underarm wax

Half leg wax

Full leg wax

## **Strip or hot wax**

## **Hot wax**

Brazilian wax

Hollywood wax

Hot wax is ideal for use over smaller and more sensitive and delicate areas of the skin. Hot wax is designed to shrink-wrap around the hair follicle, removing it from the root without pulling at the skin.

The benefits of using strip wax is it covers a larger area therefore will be more time efficient. This type of waxing however can damage the skin on sensitive areas such as bruising and ingrown hairs which is why we choose use the hot wax on those areas.

If you have sensitive skin and would like hot wax in another area not advertised above, please ask and we can advise.
